

Situs Correction — Evidence Packet (Demonstration)

Civvix Inc.

September 2026

Every value below is real and comes from public sources. The roster row is from the City of Hendersonville's published business-tax roster, not from a Department of Revenue situs report; the packet format is identical. This is what one finding looks like when it is ready to send.

Submitting jurisdiction	Sumner County, Tennessee
Prepared by	Civvix Inc., under contract to Sumner County pursuant to T.C.A. § 67-1-1704(e)
Packet ID	SUMNER-2026-09-0001
Reviewed by / date	_____ (analyst) · _____
Approved for transmittal / date	_____ (Finance Director) · _____

1. Account

Business name	TOOL PLANNERS, INC.
Location address	1780 SHELL RD, HENDERSONVILLE TN 37075-8457
Account / location ID (as shown on roster)	103789037
Roster source	City of Hendersonville business-tax roster, public GIS table, snapshot 2026-09-12
Coded situs (per roster)	8305 — Hendersonville
Measured situs	8300 — Sumner County, unincorporated

2. Where the business physically sits — four independent official sources

Source	Custodian	Says
Sales Tax Rate Boundary polygon	TN Department of Revenue	8300 — Unincorporated
Streamlined Sales Tax address-range file (1780 Shell Rd, 37075)	TN Department of Revenue	8300 — Unincorporated
NG911 address point, Inc_Muni field	TN Emergency Communications Board / Sumner County ECD	Unincorporated
Certified municipal boundary	TN Comptroller, Office of Local	Outside every municipality

Source	Custodian	Says
	Government	

All four agree. There is no official source that places this address inside Hendersonville.

3. Boundary analysis

Rooftop coordinate	36.399306, -86.651799 (NAD83; measured in EPSG:2274, TN State Plane, US ft)
Nearest jurisdictional seam	4,802 ft — the seam between 8300 (unincorporated) and 8308 (Millersville)
Distance to the Hendersonville (8305) boundary	greater than 4,802 ft
Risk band	NORMAL (>1,000 ft) — boundary precision cannot explain the discrepancy
Address match	rooftop address point at 0 ft from the business location

4. Evidence score — 100 / 100

Component	Points
Inside a Department tax-rate polygon	+30
911-authority rooftop address point	+20
All official sources agree on jurisdiction	+20
Department address-range file matches the polygon	+15
Business point within 100 ft of the rooftop	+10
Address current in 911 layer	+5
Penalties (seam proximity, source conflict, mailing-only address)	0

Disposition: **READY — analyst sign-off then submit.** Auto-submit floor is 85 with no unresolved source conflict.

5. Direction of correction

Correcting this account moves the situs half of local option sales tax on this account's sales **from the City of Hendersonville to Sumner County**. The education half is unaffected (both are in Sumner County). This packet is reported to the County whether or not the County elects to submit it.

6. Source provenance

Layer	Snapshot	Features	SHA-256 (first 16)
DOR Sales Tax Rate Boundaries	2026-09-12	473	7ef2e86c000c3bea
SST address-range file	2026-09-12	15,102	f2a2059fae8eeca9

Layer	Snapshot	Features	SHA-256 (first 16)
(Sumner)			
Comptroller municipal boundaries	2026-09-12	345	5dec8de70e3dafe3
NG911 address points (Sumner)	2026-09-12	107,113	0686a0240fff6509
Hendersonville business-tax roster	2026-09-12	3,270	bc3f1edde8b17c8a

Every layer is retained unaltered so that this finding can be reproduced against the geography in force on the date above.

7. Attachments

- Map: rooftop, situs polygons, nearest seam with measured distance (exported from the workbench).
- Street-level verification: Google Maps / Street View link (human verification only; not used in any measurement).

Cover correspondence — for the County’s signature

Re: Situs correction — Sumner County — [N] accounts

Pursuant to Tenn. Code Ann. § 67-1-1704(d), Sumner County has reviewed its situs report dated [date] and identified the accounts listed on the attached marked-up report as coded to a situs other than the jurisdiction in which the business location physically sits. For each account the County attaches an evidence packet showing the location’s position relative to the Department’s published sales tax rate boundaries, the Department’s Streamlined Sales Tax address-range file, the Comptroller’s certified municipal boundary, and the 911 addressing authority’s records, together with the measured distance to the nearest jurisdictional boundary.

The County requests that the Department verify these accounts, correct the situs code of each account found to be miscoded, and adjust distributions for the period permitted from the date of this notification. The County is prepared to furnish proof of corporate boundaries on request.

[Finance Director], Sumner County

The process, as best it can be documented

1. **The County pulls the situs report** from the Revenue External Portal. County officials only; their credentials; no vendor involvement in that step.
2. **The vendor matches and adjudicates** — in the County’s environment. The roster never lands on vendor infrastructure. Each candidate gets a packet like the one above and a named reviewer.

3. **The County decides what to submit.** Both directions are reported; the County chooses.
4. **The County sends.** There is no Department form, no portal function and no statute governing corrections. MTAS's documented procedure is to mark the corrections on the situs report itself, keep a copy, and send it to Financial Control with each business's sales-tax account number. The vendor prepares the marked-up report, the packets and the cover letter; the County signs and transmits. This is also how Knox County structured its 2020 procurement: the vendor prepares correspondence, the Senior Director of Finance approves and sends.
5. **The Department verifies.** Per the Knox County RFP, the Department sends a request for verification; the other party may concur, not reply (treated as concurrence), or dispute. No appeal process is documented anywhere. Turnaround is unpublished.
6. **Adjustment.** Small amounts are netted against the next month's distribution; larger amounts are spread over the following year. Corrections reach back one year from the date of notification — Department practice, not statute.

Why the County sends and not the vendor. Two reasons. § 67-1-1704(e) forbids the contractor from disclosing roster information "to any other person," and while the Department is the source of the data, keeping the County as the sole channel removes any argument. And the Department's process is built around the local government as the party of record — the notification date that starts the one-year clock is the County's notification. Vendors in California file petitions directly under written authorization; Tennessee has no equivalent mechanism, and none is needed.
